Why This Problem Happens?

- People who are new in a city are **unaware about nearby hospitals**.
- People **go to unqualified doctors** don't get better treatment of their diseases.
- People **waste their valuable time** in searching hospitals.

What Could We Do?

- Providing users with an app to search for **every type of medical help** needed and within time.
- Providing **nearby hospitals** to user.
- Users will be provided only **authentic hospitals and doctors**.

Problem faced by users without digital directory:

- Lots of confusion
- **Wastage of valuable time** finding resources
- Suffering Patients
- **Rush in the Hospitals**

Competition:

- All in one app
- Our app is **light weight and easy to use**
- We will **keep updating features** of our app regularly so that we are ahead of other competitors

Our Vision:

- To **help our country and it's people** in their health related problem
- To **promote digital India**
- To **save everyone's precious time**
- To **save Lives**
- To **help people and make them feel safe and connected**
